INTERNATIONAL JOURNAL OF CARDIOVASCULAR MEDICINE AND SCIENCE © (AN INTERDISCIPLINARY JOURNAL)

The official Journal of the International Society of Cardiovascular Medicine and Science

TOPICS COVERED

Emphasis will be on Cardiovascular Medicine, Research and Therapeutics, Molecular Biology, Genetic Engineering and Bioengineering.

- Vascular and Cardiac function and disease
- Cardiopulmonary Disease
- Neurovascular Disease
- Transplantation
- Hypertension and Atherosclerosis
- Pathology and Morphology
- Imaging Technology
- Non-Invasive Technology
- Minimally Invasive Technology
- Gene and Hormone Therapy
- Lipid and Antioxidant Research
- Intervention Technology
- Cellular Morphology
- Bioengineering
- Hemodynamics
- Tissue Mechanics and Engineering
- Blood Flow and Rheology
- Electrical Activity
- Computational Methods
- Nuclear Medicine
- Hemocompatibility
- Pediatric/Geriatric Cardiology
- Circulatory Support Devices
- Cardiovascular Drugs
- Drug Delivery
- Cardiovascular Diet & Nutrition
- Clinical Trial Design
- Bench and Animal Modeling
- Regulatory Science

This interdisciplinary Journal will publish original peer reviewed articles in all facets of Cardiovascular Medicine, Surgery, Science and Bioengineering. Both basic science as well as applied clinical articles are solicited.

INSTRUCTIONS FOR AUTHORS

Send original and two copies of the manuscript to:

Jafar Vossoughi
Editor-In-Chief
International Journal of Cardiovascular
Medicine and Science
4401-A Connecticut Ave, NW, PMB 327
Washington, DC 20008-2322
Telephone: (202) 274-7008; Fax: (202) 274-7009; E-mail: vossoughi@classic.msn.com

PREPARATION OF MANUSCRIPTS:

Typewritten manuscripts must be double-spaced (8.5" x 11"; 22 cm x 28 cm) with one inch margins all around. The cover page must include the title of the manuscript, full names of the authors with the appropriate degrees, full address, telephone, fax and e-mail of each author. The corresponding author must be identified. A maximum of 10 of the most appropriate keywords must appear on the cover page.

A separate abstract page should accompany each manuscript containing approximately 200 words of factual information. The abstract should briefly include the problem studied, the method used, the results obtained and the conclusions.

It is suggested that the rest of manuscript start with the introduction and then materials and methods, results, conclusions, discussions, acknowledgments and references.

Although, there is no imposed limit, a typical original manuscript should be approximately 40 double spaced pages (including references and tables) with a reasonable number of illustrations and photographs.

REFERENCES:

References must be typed on separate pages, numbered and listed alphabetically. References should be given in the text using numbers in square brackets or alternatively with name(s) and number(s). References should be typed in a uniform style according to the format given in the following:

JOURNAL ARTICLES:

Hong, MK, J Vossoughi, CC Haudenschild, SC Wong, BD Zuckerman, MB Leon. Vascular Effects of Diet-Induced Hypercalcemia after Balloon Artery Injury in Giant Flemish Rabbits. *Am Heart J* 1995; 130:758-764

BOOKS:

McDonald, DA. **Blood Flow in Arteries**, 2nd Ed, The Williams & Wilkins Co, Baltimore, 1994

BOOK CHAPTERS:

Roelandt, J. Echocardiographic Evaluation of Vascular Prostheses. In: Diethrich, EB (Editor). **Noninvasive Cardiovascular Diagnosis, Current Concepts**, University Park Press, Baltimore, 1978, 431-441

CONFERENCE PROCEEDINGS:

Friedman, MH, VA Hacker, BF James, BD Kuban, J Qin, P Schmalbrock. MRI Measurement of Arterial Branch Geometry. Biomechanics Symposium, RL Spilker, MH Friedman (Editors) ASME, New York, 1991, 45-58

ILLUSTRATIONS:

All illustrations (diagrams, graphs, etc) should be in black and white or color (the cost of color production is charged to the corresponding author) with heavy lines and legends so that they remain legible after considerable reduction. All illustrations and black and white photographs should be camera ready.

LEGENDS:

Photographs and illustrations should have appropriate legends and must be typed on separate pages. They should be pertinent, brief, but complete. Photomicrographs should have scales and their stain and magnifications should be identified in the legends. Neither the manuscript nor the photographs will be returned to the authors.

ACKNOWLEDGEMENT OF COPYRIGHTED MATERIALS:

Photographs and illustrations taken from other publications should be fully credited within the legends. Permission letters from the appropriate publisher(s) should accompany the manuscript. It is the author's responsibility to secure permission for use of copyrighted materials.

GALLEY PROOFS:

Proofs will be sent to the corresponding author directly from the typesetter. Authors should check the proofs very carefully and return the proofs to the publishers promptly. Reprints should be ordered at this time.

INTERNATIONAL JOURNAL OF CARDIOVASCULAR MEDICINE AND SCIENCE ©

Volume 1, No. 3/4, 1998. International Journal of Cardiovascular Medicine and Science is published quarterly (one volume per year, four issues per volume) by Medical and Engineering Publishers, Inc.

Annual subscription rates for 1999: domestic, \$45 for individuals, \$65 for institutions, International \$15 additional. Single issue, \$20. Prices include shipping (surface) and handling charges. For Airmail add \$30. Orders must be prepaid. For advertising rates and details please contact the Publisher.

Printed in the USA on acid free paper. Copyright © 1998 by Medical and Engineering Publishers, Inc. All rights reserved. No part of this publication may be reproduced in any form (mechanical, optical, electronic, or photocopying) without the written permission from the publisher.

The Opinions and statements expressed in the individual articles, letters, communications, etc. are those of the author(s) and not necessarily those of the editors, members of the editorial board, publisher or the Society. They also disclaim any liability or responsibility for the materials printed in this Journal. The appearance of the advertisement and promotional materials printed in this Journal does not imply our endorsement, guarantee, or approval/disapproval of the claims made by the advertisers for their products and/or services.

Printing of the previously published copyrighted materials in this Journal is secured in writing by the corresponding author of the associated manuscript. This implies that the authors signed a form that they themselves have obtained the appropriate copyright release from the original sources.

The circulation diagram on the cover is used by permission from: Physiology and Biophysics, TC Ruch and HD Patton (eds.), 20th edition, 1997 (Figure 1.1, Page 4), WB Saunders Company.
